Product Information

Vigortone FC No. 32SG Medicated is a complete mineral-vitamin mix containing the dewormer Safe-Guard and is designed specifically to be fed free-choice to cattle. It provides the benefits of a quality dewormer program without the inconvenience of having to gather and handle pastured cattle.

No. 32SG contains calcium necessary for strong bone development, maximum milk production, and other body functions. Phosphorus, provided in No. 32SG, is necessary for optimum energy utilization, reproductive performance, and fiber digestion. No. 32SG also contains magnesium and a specially formulated blend of trace minerals including copper, zinc, manganese, selenium, cobalt, and iron. These minerals play vital roles in body metabolism and are necessary to build and maintain an active immune system, healthy tissues, and overall animal health. Several of these trace minerals play key roles in energy and protein metabolism and are essential to optimize efficiency and rate of gain. Vitamins A, D, and E, also included in No. 32SG, play key roles in the maintenance of optimum health, growth, and reproductive performance. No. 32SG does contain salt.

For a more detailed discussion on Safe-Guard and deworming cattle, reference Vigortone's Feed Additive Sheet on Safe-Guard and Timely Topic No. 1121 — Worms Of Cattle.
